

## **Coaching Skills for Principals** *Leadership Personal Development* 1 - 2 Day Program commencing May 2011

***Simple, practical and effective strategies to assist Principals and Leaders increase their ability to lead effective school change!***

Are you a Principal or Leading Administrator ready to step out and make a difference in your school? Would you like to move to the next level of performance? Do you want to see real, measurable improvements in achievement? Are you ready to build teams that are highly productive?

A coaching culture within a school system is the most effective method for individuals and teams to go beyond just goal setting. It inspires an awareness of what is possible to achieve and increases your ability to lead effective school change.

This program incorporates a combination of training and coaching and is designed to build the coaching skills of principals so they can more effectively support the development of themselves and others, address performance management issues, enhance levels of motivation and commitment and facilitate greater standards and results.

This dynamic and informative workshop is specifically designed to –

- Embed a strong culture of leadership coaching within your school
- Extend and sustain your leadership effectiveness
- Define and reach measurable goals for improving your school
- Gain insights into your own beliefs and behaviours
- Increase team effectiveness
- Feel engaged, positive and motivated in your role and to have this influence on those around you
- Develop practical questioning and listening techniques
- Learn to think from a different perspective, and do things differently

Coaching Skills for Principals Program will enhance your skills as a coaching Principal, enabling you to further encourage and build your staff's confidence. You will receive valuable practical tools to use immediately. The outcomes will assist you in understanding the needs of your staff, ensuring that they become a stronger team that gain more enjoyment in their shared roles as team members and educators.

*Life Skills Programs uses coaching, mentoring and training strategies to build leadership skills, develop teamwork and improve communication. We work to help leaders and their teams to achieve the results they want. Our commitment is to assist leaders in building workplaces where people want to be; where the focus is on looking for solutions instead of focusing on problems, where people are valued and encouraged, and want to make a commitment to their organization.*

## **Coaching Skills for Teachers**

1 - 2 Day Program commencing May 2011

***Simple, practical and effective strategies to assist Teachers to improve classroom practice, student learning and achievement!***

Are you a teacher who wants to build an empowering classroom culture? Do you want to take better care of yourself and become more resilient and confident? Would you like to respond effectively to common classroom misbehaviours? Do you want to build confidence and self-esteem in your students?

We know that teachers are increasingly being asked to adopt innovative teaching strategies to meet the diverse needs of students and to build positive relationships amongst students to promote a culture of value and respect. Teaching already demands a set of complex skills largely mastered in the isolation of their classroom; now they must take on even more and still largely alone.

Coaching skills for teachers provides a vehicle for teachers to increase their self-awareness, discover more options, make better choices, create positive change and be more effective in their roles.

This dynamic and informative workshop is specifically designed to –

- Create a different reality through exploring values and beliefs
- Learn how to influence rather than control
- Identify individual strengths and how to use them effectively
- Learn to think from a different perspective and do things differently
- Use observation and coaching tools to solve problems
- Develop practical questioning and listening techniques
- Ability to communicate ideas with emotional intelligence
- Increase your confidence in teaching
- Improve student learning
- Develop mutual respect and trust among colleagues

Coaching is a powerful tool for change and has the potential to motivate good teachers to become great teachers!
